Description:

Experience incredible imaging performance, with up to 101 hours Full HD recording on 240GB built-in HDD and more on optional memory card. With advanced optical technologies and advanced user features to capture beautiful, detail-packed video and stills. Wobbly pictures are a common problem when you're shooting without a tripod. New Optical SteadyShot Active Mode delivers best-ever '3-way' camera shake correction at all zoom settings, even when you're walking along. Now, add our IR or laser to illuminate a target at 100 yards plus.
