Description:

Now, for the first time, a portable camera/PTZ controller with built-in codes. Ready to use. This unit allow a quick checkout of cameras and PTZ's that are Pelco D or P compatible before installation and after. Save time and money. This hand controller is part of our Interceptor series of camera & PTZ control using Pelco codes. Adding the Interceptor interface allow control from two-way radio, or the internet. Just plug in a 12Vdc source and a video monitor and your system is up and running. A built in text messaging for the OSD character input makes it easy to add characters to the screen.
