<b>Power:</b>	120 Vac
<b>Recording:</b>	Manual, Motion, Alarm, & Sch.
<b>Memory:</b>	SD Card

**Description:**

This new surveillance system incorporates Sony's new high resolution pinhole camera. Now, here is a low cost portable Interrogation Room recording system or used as a back up system. It also could be used as a Room Observer with video motion detection, recording only when someone walks into the room. Another application could be for drug buys in hotel rooms.

At the end on the operation, plug in a monitor and play back the video and audio. Use the memory card for your case file or burn it to a CD.

The remote control is used for setting the OSD file and play back. Protect your office, a room, or any hall way, etc.!!

**Every Chief should have one of these!**
