Description:

This new surveillance DVR is perfect for all single video input recorder applications. With video motion detection built-in, this recorder will simplify many covert camera operations. One could even replace their old tape recorder on their body wire receivers with a mini video monitor. The 720 x 480 at 30 FPS makes it ideal for all surveillance applications. One could make up his own surveillance system or how about an in car video system recorder. With one alarm input, it can be triggered by any switch or relay closure.
