4 Channel DVR with 19" Monitor for Interrogation Rooms

MODEL # KSR-9004-INT

Features:

- Whisper 1 Microphone System
- Hi-Res Color Camera Included
- 4 Video Channel Inputs
- 100 FPS Recording
- RJ-45 Connector for Network
- One TB Hard Drive Included
- Motion Detection
- Four Channel of Audio
- Supports Pelco D for PTZ Control
- 2 Each USB Ports for Recording
- Ask about our Portable System

NEW!

Low Cost!

\$1995.00

Specifications:

Monitor:	19" Color
Compression:	H.256
Video Inputs:	4
Audio Input:	4
Video Output:	1
Audio Output:	1
Power:	115Vac or 12 Vdc @2 A
Resolution:	1024x768
Mouse Control:	Yes
USB:	2
Network:	Yes
Remote View:	Cell Phone
PTZ Control:	Pelco D built-in

Description:

This new interrogation room recording system comes complete with everything you need to record an interview. Our PIRC-20 color camera, Whisper 1 microphone system, DVR, one TB HD, camera & microphone with 50' of cable. One video input maybe used for close up of suspect (use one of our many covert cameras) or use one of our PTZ cameras with full control from software. Use a thumb drive to record the interview or just down load the video/audio from the hard drive.

Recording Systems Used in Interrogation Rooms

Our interrogation room recording systems are designed with the latest industrial grade equipment available on the market place today. Our design concept goes back to the ess---- of what is really required in a recording system. First and most important is the sound systems. DOJ suggests a full stereo audio systems with a dynamic range of at least 50db. Our Whisper microphone far exceeds the spec and delivers 60db. As its called the Whisper microphone, you can hear a whisper to a gun shot thru our system.

Our video system is second to none. The camera we use today are a full 600 line resolution in full color. The main camera is a PIRC-20 color camera. With of course our Whisper microphone system.

The video recording on one of our systems saves the video to a large video hard drive. Once the interview is completed, the video is down loaded to a DVD disk for the case file. At the time of this writing, we are being pressured to design a system that would record directly to a new flash drive. That approach is in development.

Digital Interrogation Room Recording System

MODEL # INT-DVD-4C

Features:

- DVD Video Recording HD
- 250 GB HDD - 500 GB (Optional)
- 30 FPS Video Recording
- 60 to 215 Min. of Video Recording
- Stereo Audio Recording
- Industrial Grade Recorder
- SD Card Input

\$3,895.00

System Includes:

A recording system with a 250 GB HD and a DVD writer. Stereo Microphone System, 50' of cable for both video and audio componets, Steel Cabinet, 1 Video/Audio Output, Power Strip & PIR-C20 Camera, with Time date generator.

Description:

This is the latest in interrogation room recording systems using the new DVD technology and Blue Ray. Video recording time is controlled by the selection of the DVD disk. Standard DVD disk will go 3.5 hours and the Blue Ray will record 5 to 10 hours.

This new system also includes a SD slot for saving your body worn recordings to a low cost DVD disk. This unit operates a little different than the past. This unit saves the A/V file to the HDD and then you down load it to a DVD disk, thus you can make as many copies as you desire. This unit is future of HD recordings in DVD. When the courts add Blue Ray players, your department will way ahead.

An optional distribution amplifier is used to send the audio and video to more than one office at the time of the interrogation.

Options:

Picture-in-Picture (2 Cameras) \$1,195
 19" Color Monitor with stereoaudio \$450
 Distribution Amplifier (4 Outputs) \$250
 DVD Duplicator \$595 (Recommended)

Cameras Used in Interrogation Rooms (Standard)

PIRC-20C Color Camera

This camera is shipped with all systems. It is a high resolution color camera with a field of view of 89 degrees. This camera is our work horse in interrogation rooms and jails. The specifications are: 12Vdc operation; .1 lux sensitivity; auto white balance; 600+ lines of resolution, and comes complete with power supply.

PIRC-20C \$450.00

Our KSC-1247 AC outlet covert camera is the latest in high tech design. The camera looks out through the ground lug hole in the middle of the plate. For standard operations, the outlet is mounted about 4.5' from the floor. We can make the lens somewhat wide angle (4 mm) or use a 6 mm or 8mm lens which really zooms in on the target.

KSC-1247 \$560.00

This covert camera has lots of possibilities; interrogation rooms, hotel rooms, and office operations. This unit comes with a high resolution (540 lines) color camera. The lens is generally a 3.7 mm wide angle lens. However, we can put a higher zoom lens in this unit.

KSC-45 Color \$450.00

KSC-46C Thermostat Camera

This is another approach to hiding a camera in a thermostats used in many buildings. Again our high resolution color cameras are used.

KSC-46C \$450.00

KSCC-1 Phone outlet Camera

This is the latest covert camera design to be used in interrogation rooms. Fitted with an 8 to 16 mm lens, a suspect's face can be photographed with ease. This camera is to be placed across from the suspect in the wall at about head height. Please specify distance from wall to suspect. Our most popular second room camera.

KSCC-1 \$495

Cameras Used in Interrogation Room (Special)

Interrogation Room Dome Camera Kit MODEL # KSC-260INT

Shown without mounting ring
Optional Controller & Recorder

KSR-9004

KSR-6004

Features:

- 12 Vdc Operation
- 260 Zoom Lens
- Color Camera
- Full Pan & Tilt
- Controller Included
- 4.5" Diameter

PTZ Controller

\$1695.00

Specifications:

Image Sensor:	1/4" Sony
Resolution:	535 Lines
Optical Zoom:	26X
Digital Zoom:	12X
Pan Range:	360 Degrees
Tilt Range:	90 Degrees
Diameter:	4.5"
Motion Alarm:	3X
Controller:	Keyboard Type
PIP:	Included

Description:

This new approach to interrogation room techniques is another way of observing your suspect up close. Our system kit comes complete with dome camera, 50' cable, keyboard controller and instructions.

This camera may be plugged into our standard model three with or without the PIP option. This camera is especially useful for *children* that want to move around the soft room while you are observing and asking questions. A must for those soft rooms.

Now! in IP format only \$1095.00 Software included
Just connect to your internal network

KSRC-100 \$495.00

Recording Systems Used in Interrogation Portable System Clock Radio Video Camera w/Audio KSRC-100

- Video & Audio Recording
- AC Powered
- Color Camera .001 Lux
- 8 to 64 Hours of Recording
- SD Card Memory Recording
- AVI File
- Remote Control On/Off
- Motion Detection
- Date & Time Stamped
- Audio On/Off Option

This new surveillance system incorporates Sony's new high resolution pinhole camera. Now, here is a low cost portable Interrogation Room recording system or used as a back up system. It also could be used as a Room Observer with video motion detection, recording only when someone walks into the room. Another application could be for drug buys in hotel rooms. At the end on the operation, plug in a monitor and play back the video and audio. Use the memory card for your case file or burn it to a CD. The remote control is used for setting the OSD file and play back. Protect your office, a room, or any hall way, etc.!!

This system will be complete with monitor, Whisper microphone system, Power supply, and extras. We have modified this standard unit for IP and flash drive storage.

Coming Soon!!

Model ?? New System Being Developed

- Analog or Network Cameras - Inputs
- Video & Audio Recording
- Quick Deployment
- Plug & Play
- Up to 2 TB Optional Drive or *FLASH* Drives
- Play Back Built-in
- USB Port for Quick Down Load
- H-264 Format

This DVR converts any analog camera to an intelligent, high resolution surveillance system. The analog A/V signal from the camera is captured, compressed and stored to an external USB storage media using H.264 video and MP3 audio formats. When an IP camera is connected to an KSR-HDVR, all of its features are retained, and the IP camera can be fully controlled through its own PC/Mac application in a transparent manner. The DVR further adds to the functionality of the IP camera by offering the store and forward A/V stream feature. It records the Motion JPEG video stream of an IP camera along with its audio footage to an external USB storage device connected to the DVR. The stored contents can be streamed in H.264 format, for remote viewing.

Interrogation Room Microphone System MODEL # Whisper II

Stereo \$595.00
Mono \$475.00

Specifications:

Amplifier: Whisper II
Microphone: Dynamic w/10' leads
Power: 12Vdc

Features:

- 60 db Dynamic Range
- 12 Vdc Operation
- Full Stereo Operation
- Approved by DOJ
- Used by Hundreds of PD's All over the World

Description:

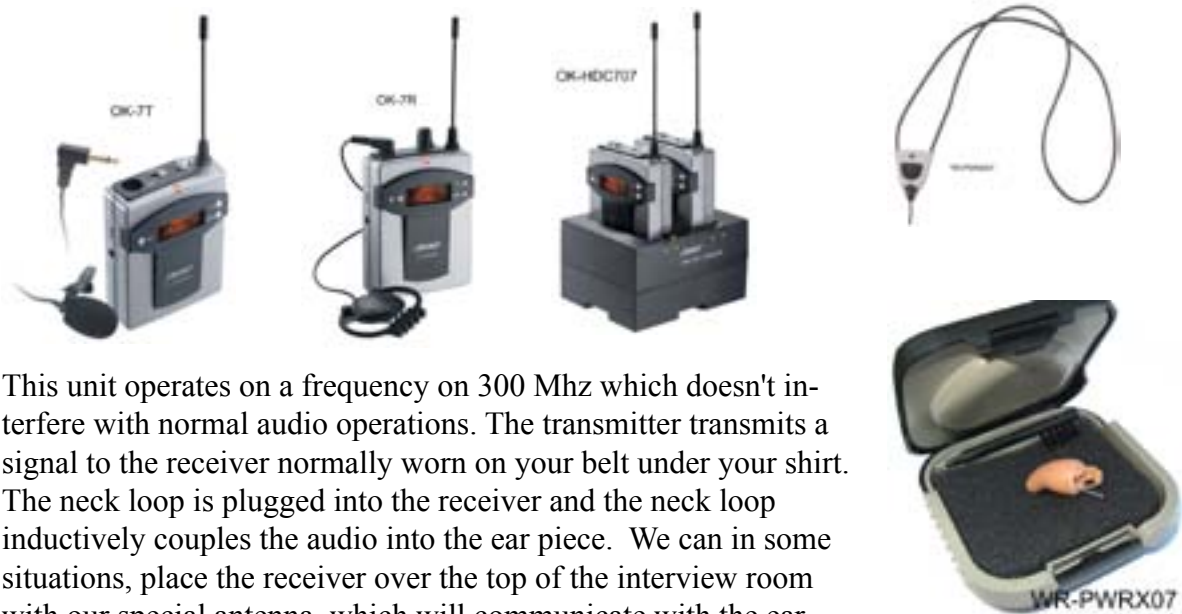

This new Whisper microphone system for interrogation far exceeds any other microphone system on the market by two fold. The dynamic range of the amplifiers is so good that the system can pick up a whisper in the interrogation room. Just put two suspects in the same room and walk out for a few minutes, and the two will whisper two each other about their story, and it's all picked up by the system. Don't buy a recording system unless it has a stereo input.

Optional Equipment Used in Interrogation Systems

MicroEar Wireless Interview System

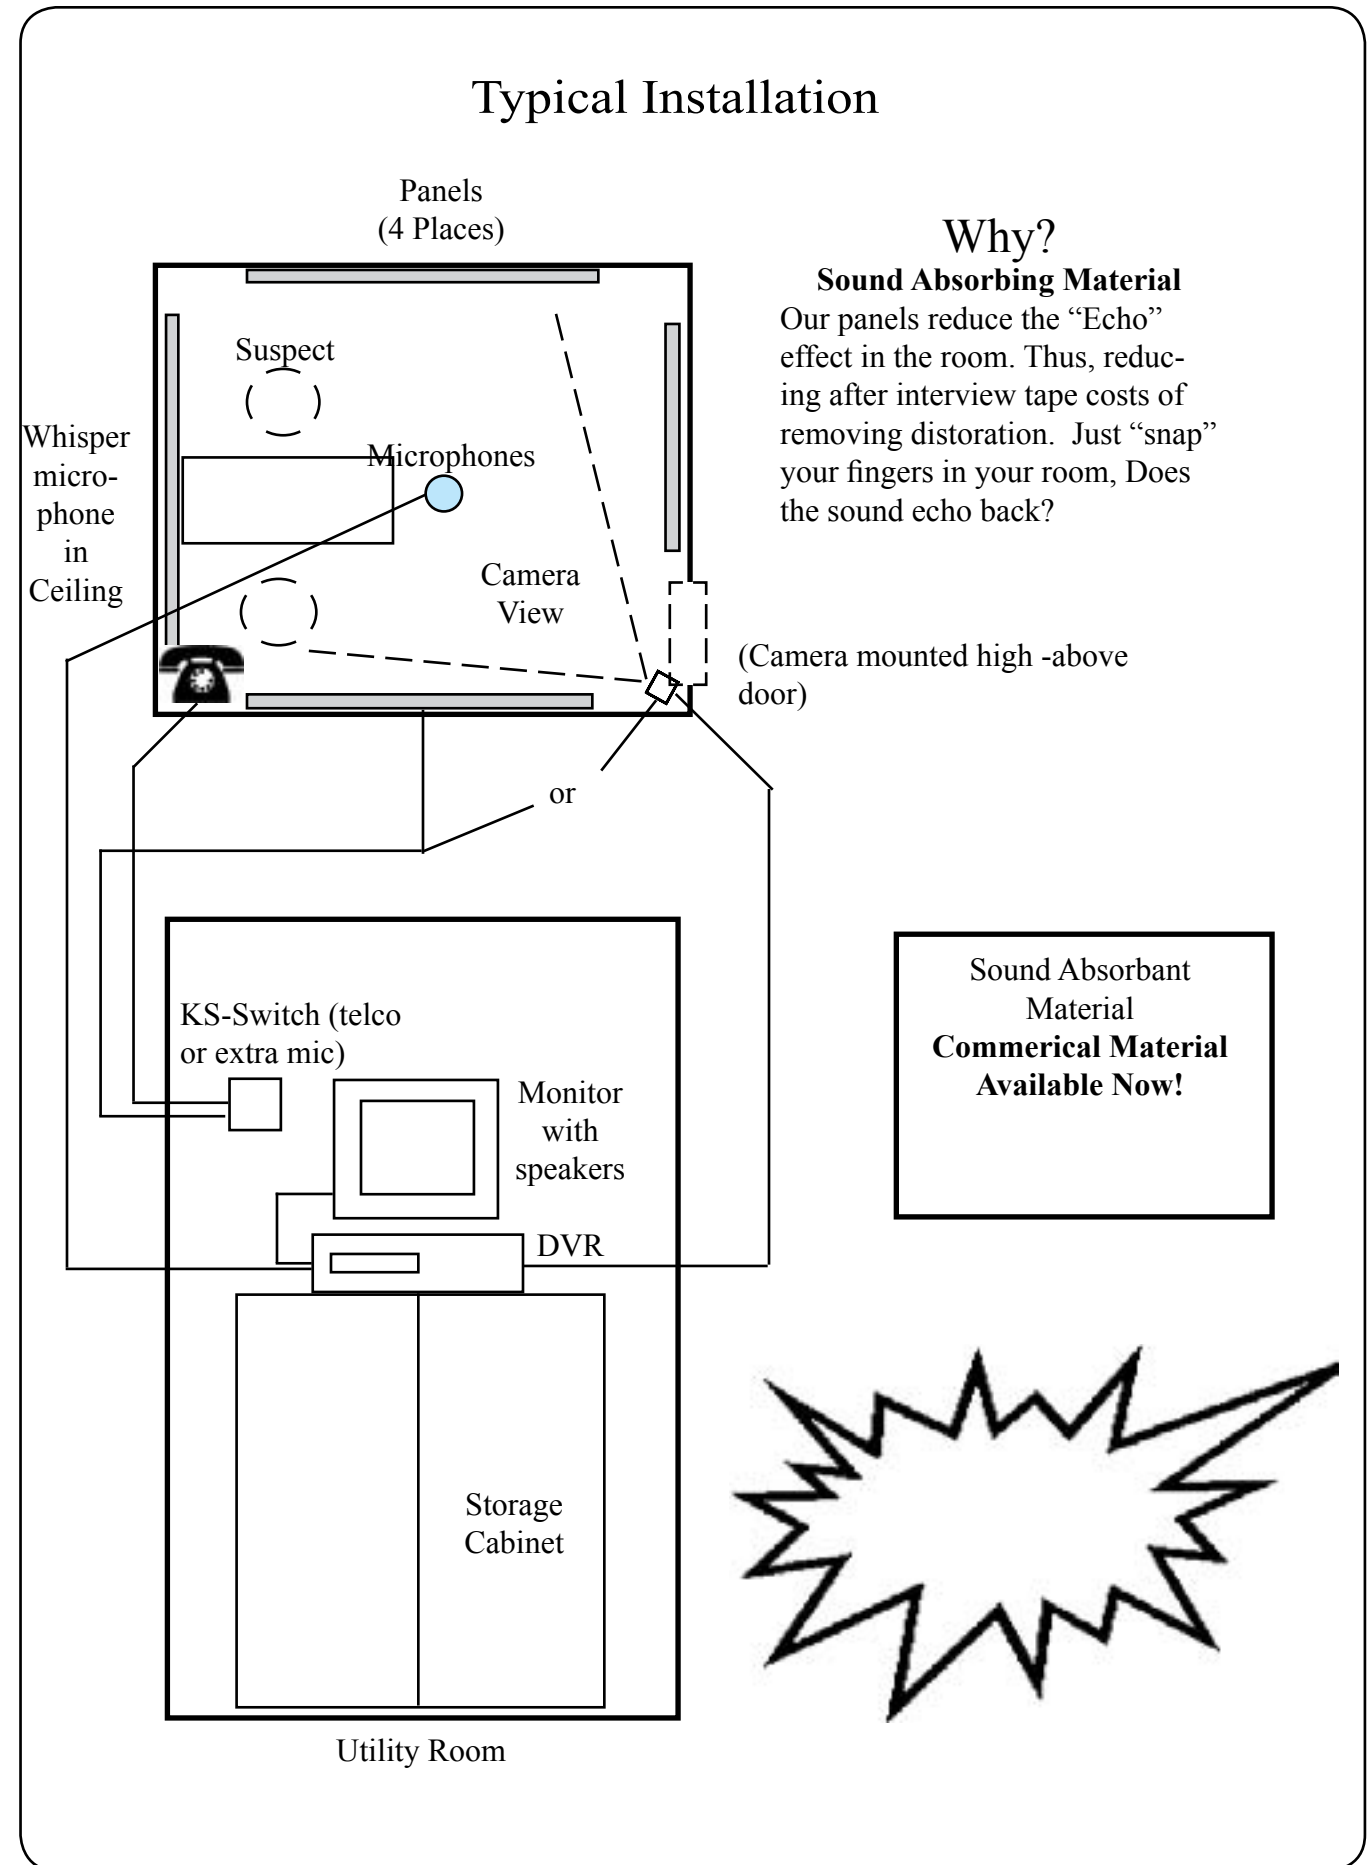

This unit operates on a frequency on 300 Mhz which doesn't interfere with normal audio operations. The transmitter transmits a signal to the receiver normally worn on your belt under your shirt. The neck loop is plugged into the receiver and the neck loop inductively couples the audio into the ear piece. We can in some situations, place the receiver over the top of the interview room with our special antenna, which will communicate with the ear piece.

Price: \$795.00

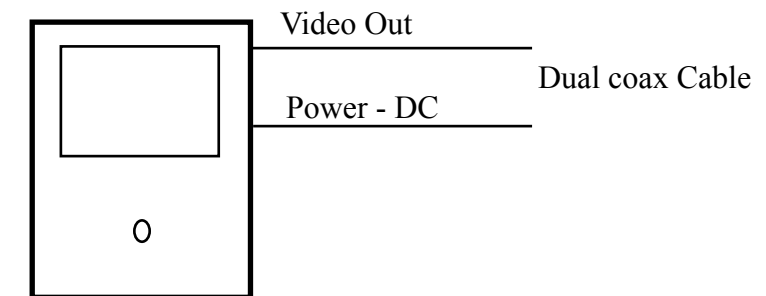

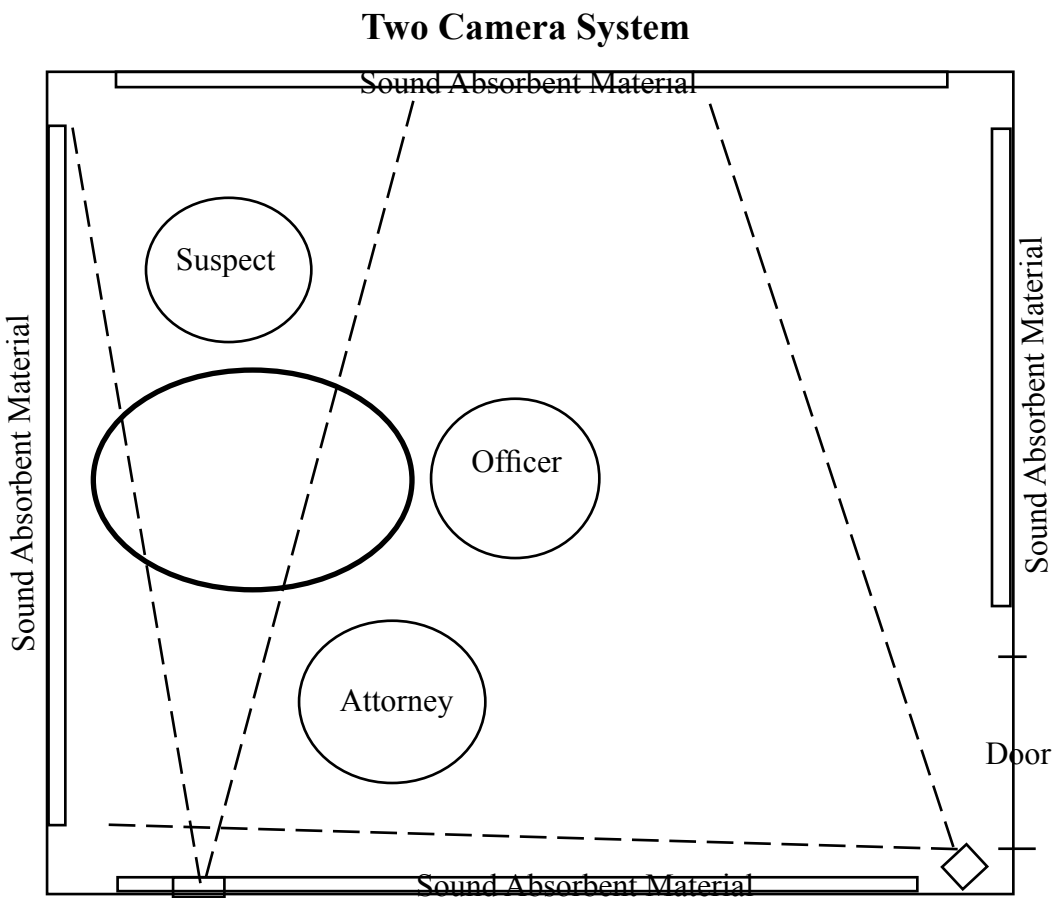

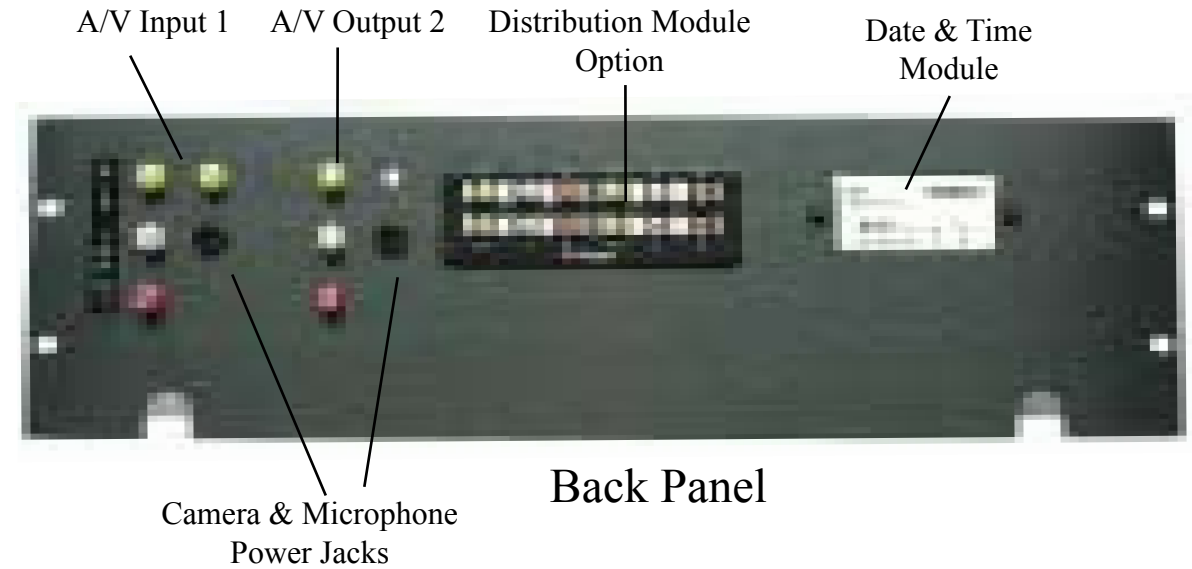

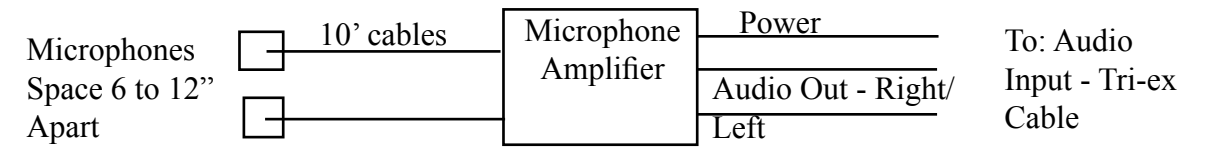

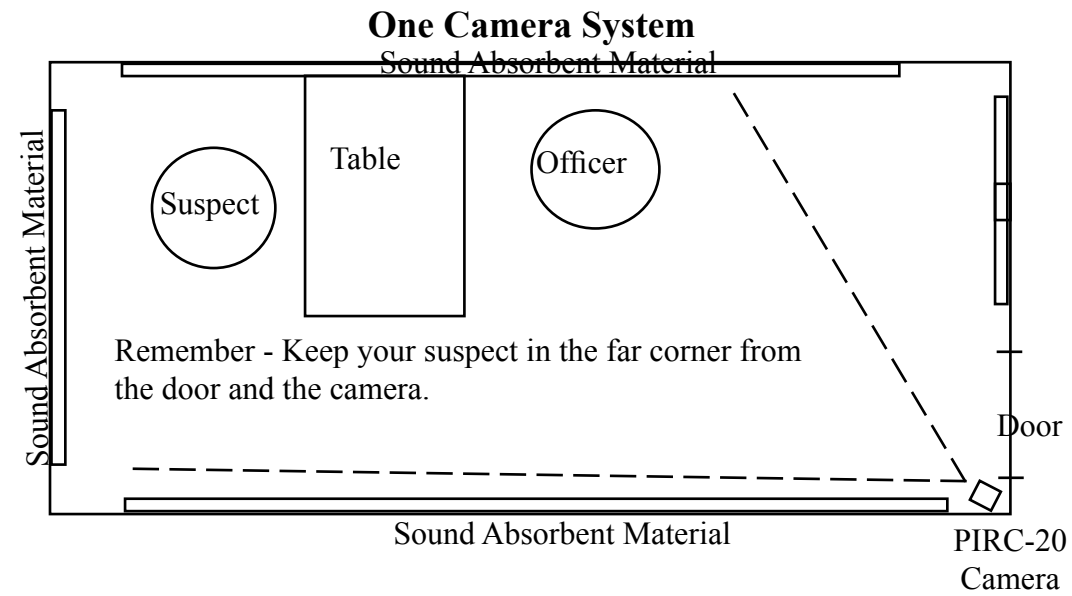

The MicroEar Wireless Interview System allows for prompting the Interviewer without interrupting the interview. Now the line of questioning can be directed without alerting the suspect that something they said was of interest. The short range (100' to 200') of the system keeps the transmissions in house. Used with the ParMarLow WR-PWRx07 Wireless Earpiece, the suspect is unaware that the interviewer is receiving information from the investigative team. This is extremely valuable when interviewing children and young adults who are very aware of their surroundings.

The MicroEar is bundled with the Okayo Wireless Microphone system with our wired or wireless earphones to make a reliable low profile prompting system costing less than most law enforcement two way radios. Each system includes a Transmitter, Receiver, Charger (shown with Transmitter and Receiver), Rechargeable Batteries, Wireless Receiver, Neckloop and Lapel Microphone.
