- Portable
- 4 Hour Battery
- SD or SDHC Card Memory
- 30 FPS @ 1280 x 740

Description:

This digital camera is the ultimate in Still/Video photography for surveillance applications. The new D500 digital camera has a pixel resolution up to 15.10 million. This package is easily carried in a back pack for those applications where one has to carry the camera to remote locations.

The 75 to 300 mm lens is optically stabilized which allows shooting from a hand held position. We do have an upgrade to a 100-400 mm lens for longer shots, but is much heavier.

There is a number of memory modules available including the new SDHC which are available in sizes up 15 Gb today. We also offer a laser (USA) 100 mW. Examples of photo are available on our web site www.covert-systems.com.

The system comes in a padded Pelican case with room to expand. Many options are available in battery size and memory modules.
