**Video Control Center
MODEL # VCC-1**

Features:

- 12 Vdc Operation
- DVR - 10 Hour
- Video & Audio Inputs
- Trigger Input
- Aux. Video Output
- LCD Color Monitor

\$3,595.00

Specifications:

Recorder:	KSR-D200
Power:	12 Vdc @690 mA
Case:	Pelican 1500
Monitor:	5" LCD Color
Weight:	13 Lbs
DVR (10 Hr)	add 500.00

Description:

This new surveillance system incorporates Sony's new HI8/Digital recorder, which is the heart of this new versatile Video Control Center (VCC-1).

However, we are able to upgrade the new VCC-1 with our new 10 hour DVR (KSR-DIR) recorder. The VCC-1 makes it possible to come up with different configurations to make the heart of several kits. Just by adding different cameras, you can capture different scenarios in surveillance techniques.

By adding our Z400 day/night camera and 50' of our triaxial cable, kit becomes our "Street Observer". It is further compatible with our spotting scope, night vision cameras and many more products.

Video Control Center Kit Options

STREET OBSERVER

By adding our new KSC-Z400 day/night camera and 100' of our triaxial cable the VCC-1 will be able to record videos of store fronts, homes, graffiti, or for general observation. This camera has a manual zoom with auto focus. A simple camera mount is also included. See our camera section. **\$895.00**

manual

VIDEO SPOTTING SCOPE OPTION

This unit was designed for surveillance operations that take you into the field that require evidence collection on a video recorder from long distances. Normally used is narcotic or swat operations, it can be used for long range surveillance of vehicles. Now you can make ID's at more than 300 yards. The field of view on 12x is 17.5' at 100 yards and the 40x is 5.3'. This system is great on the range as a training tool. Scope, camera & suction mount included. **\$4800.00**

EXTERNAL BATTERY OPTION

This unit supplies a full 12Vdc at 20 Amp/Hours. Designed for the officer that needs a power source that can be charged from 115Ac source or on the way to a incident from the car. The battery source has a very low self discharge rate which makes it perfect for law enforcement use. The battery can set on the shelf for more than 6 months without recharging. Everyone knows, when you grab a battery operated device, the internal battery always requires several hours of charging before using. The new voltage indicator reads out voltage to one hundredth of a volt for accurate operation. The four outputs are: 2.1mm plug, Quick terminals, and Cigarette lighter jack & PT02. (Mil. Spec.) This model also allows powering 12Vdc sources while plugged in to 115Vac. "Its a UPS" **\$695**

NOTE: Camera kit prices are only available with the purchase of a VCC-1.

Surveillance Van Configuration

This configuration allows the VCC-1 with these options to be used in a standard surveillance van. By selecting the first option and adding a magic arm and mounting hardware one can use this system in a surveillance van by shooting the video out through a slightly darkened window.

By adding our periscope, the VCC-1 becomes your recording station with the DVR option. For a more advanced kit, see our KSS-PI-2 Portable Surveillance Kit 2.

Call for Magic Arm price.
