**IR Illuminator - Long Range**  
MODEL # KSI-100

**Features:**

- 100 mWatts
- Beam Splitter
- FDA Approved
- One Mile Range
- Built-in Spot Adjustor
- 

**\$3200**

**Specifications:**

<b>Power:</b>	<b>100 mW</b>
<b>Video Input:</b>	<b>860 nM</b>
<b>Audio Input</b>	<b>Battery</b>
<b>R.F. Output:</b>	<b>High, Low, Pulse</b>

**Description:**

Here is an IR illuminator in the 860 nM range that really works with a multitude of present day cameras. The unit may be modified for continuous use and use an external battery.

One unique feature of this unit is the beam adjustor. The two controls adjust both the elevation and the azimuth, which makes it easy to illuminate your target and keep the alignment with the camera.

The lens is adjustable for wide and narrow beam coverage. A switch on the unit provides high and low power operation. The pulse position will drive a person wearing night vision goggles bananas.

Yes, it also works on a sniper rifle.
