Description:

PVS-14 Generation 3 multipurpose lightweight night vision monocular is designed for the most demanding of nighttime applications. Currently used by U.S. military and its allies worldwide, it features the most advanced Gen 3 image intensifier tube with a variable gain control to achieve the highest quality image resolution for various light conditions.

The system also features an active projected IR LED for short range illumination allowing such activities as map reading. It can be head-mounted, handheld or camera adapted. Numerous optional accessories allow configuration to meet customer requirements.

The unit is shipped with: head mount assembly, medium and thick brow pads, eye cup, operator's manual, demist shield, sacrificial window, carrying case, shoulder strap, lens paper and head/helmet mount adapter.
