Description:

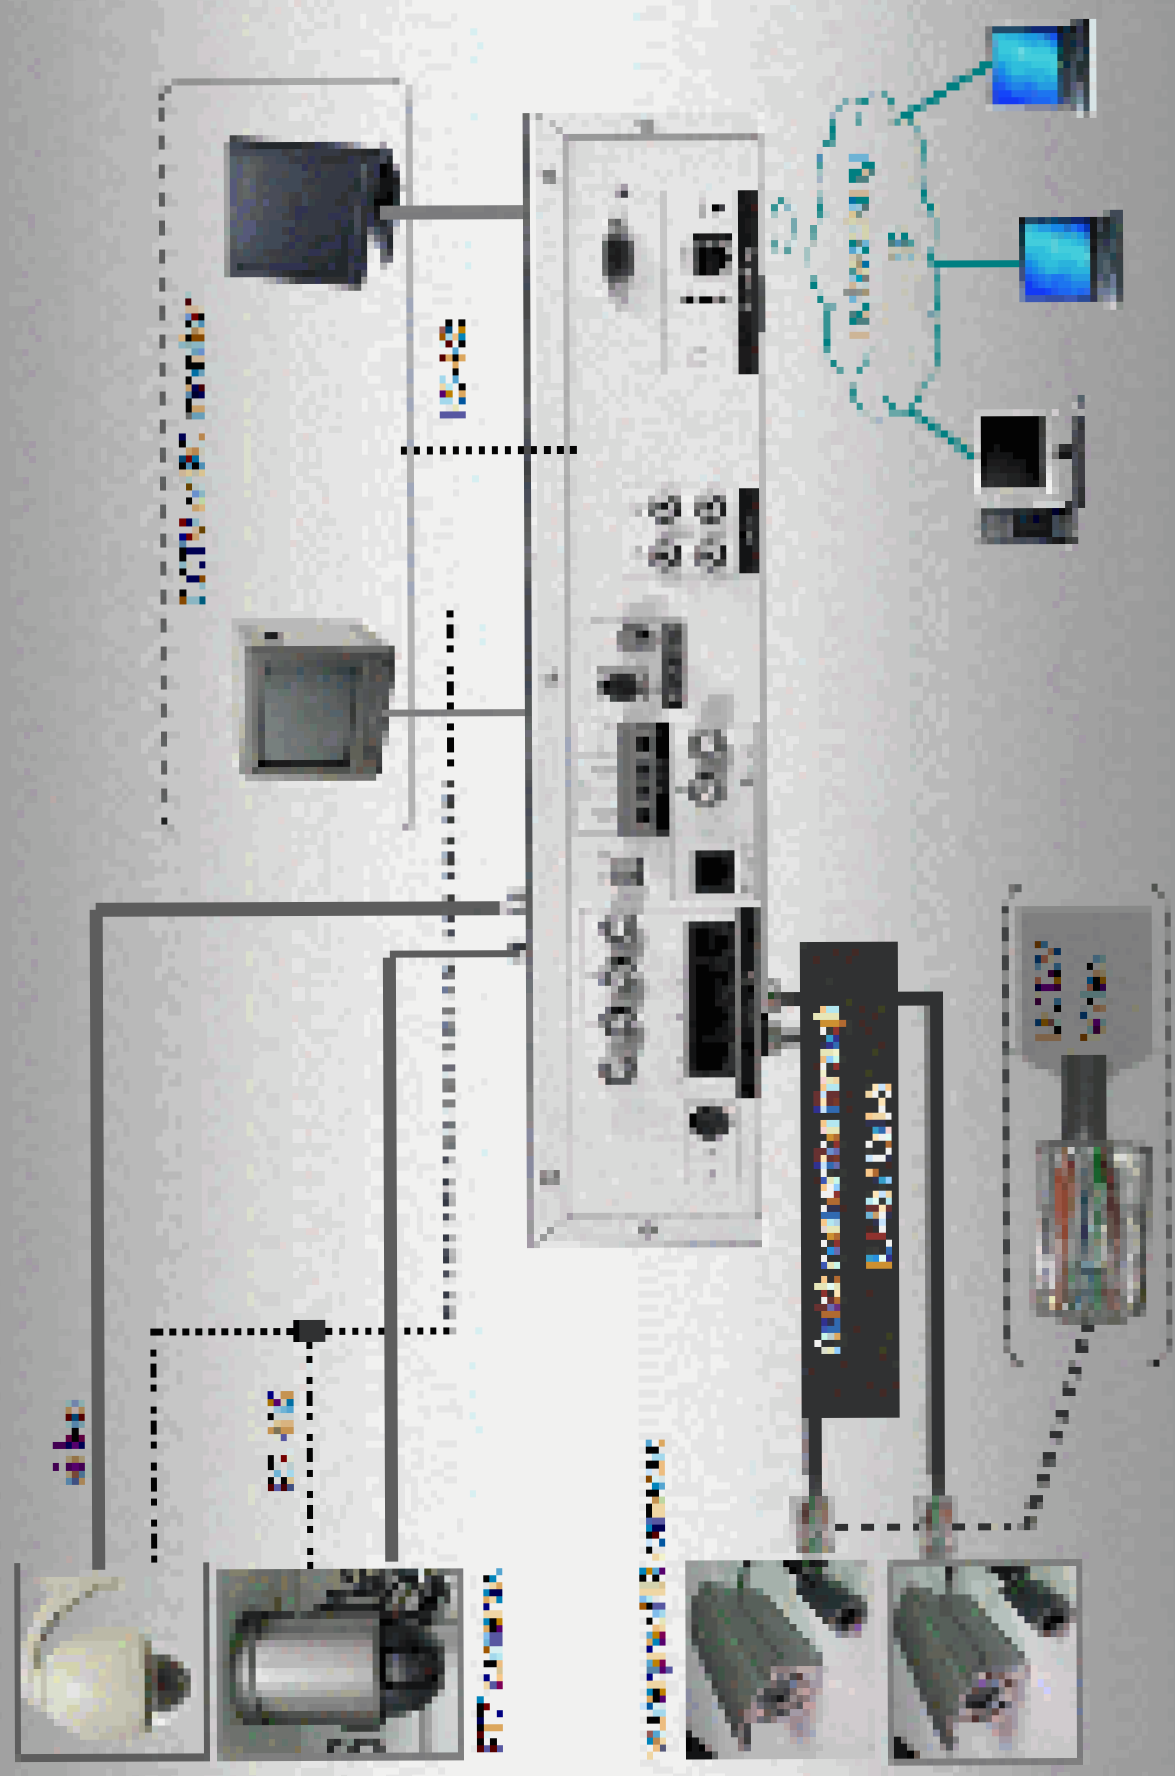

At last, a 4 camera DVR that operates on 12 Vdc with a DVD down load. This new recorder has many nice features mentioned above which will make surveillance in a van much easier. The 12 Vdc feature is great because it only draws 30 watts.

The recorder has no editing features which makes it a plus in court. The security features make it nice for general surveillance around the office.

A future feature will be an internet connection, in which we will come up with some interesting configurations with our new DTMF to RS485 board.
