Description:

The VPC-2450 Video Surveillance Pole Camera System is a complete video microwave camera disguised as a standard 25KVA utility pole transformer. The camera, pan & tilt, and zoom lens are controlled by a hand held transmitter with push buttons that control all the functions. The standard watt transmitter gives about a one mile range. Options include: color camera, switching directional antennas, five watt transmitter, and other cameras & lenses.

Our E2 Controller is recommended for non-technical operation.
