 - Remote Control (DTMF)
- Shipping Container (Re-useable)

OPTIONS:

Receiver Kit - KSR-3575-E1 or E2

Description:

The VPC-2450 Video Surveillance Pole Camera System is a complete video microwave camera disguised as a standard 25KVA utility pole transformer. The camera, pan & tilt, and zoom lens are controlled by a hand held transmitter with push buttons or the Advanced KSR-3650 series that control all the functions. The standard one watt transmitter gives about a one mile range. Options include: switching directional antennas, five watt transmitter, and other & lenses (20 -700 mm).

Our E1 or E2 Controller is recommended for non-technical operation.

Real time video is video that is not delayed by digital microwave transmission. IP systems have delay built-in and make them difficult to follow a suspect or car. Many times with IP systems, delays could be several seconds. Delays and missed video, may lose a case for you.
