<b>Monitor:</b>	<b>5" LCD Color</b>
<b>Weight:</b>	<b>13 Lbs</b>
<b>DVR (10 Hr)</b>	<b>add 500.00</b>

**Description:**

This new surveillance system incorporates Sony's new HI8/Digital recorder, which is the heart of this new versatile Video Control Center (VCC-1).

However, we are able to upgrade the new VCC-1 with our new 10 hour DVR (KSR-DIR) recorder. The VCC-1 makes it possible to come up with different configurations to make the heart of several kits. Just by adding different cameras, you can capture different scenarios in surveillance techniques.

By adding our Z400 day/night camera and 50' of our triaxial cable, kit becomes our "Street Observer". It is further compatible with our spotting scope, night vision cameras and many more products.

# Surveillance Van Configuration

This configuration allows the VCC-1 with these options to be used in a standard surveillance van. By selecting the first option and adding a magic arm and mounting hardware one can use this system in a surveillance van by shooting the video out through a slightly darkened window.

By adding our periscope, the VCC-1 becomes your recording station with the DVR option. For a more advanced kit, see our KSS-PI-2 Portable Surveillance Kit 2.

Call for Magic Arm price.
