Decoy Vehicle

How the system works

The Decoy Car is typical 4 x 4 with a camper shell. The above package is placed in the camper shell area with the pan & tilt, camera, and zoom lens mounted to the top of the shell. The windows may be covered with the IR glass for best results or tinted slightly. Curtains are also recommended. The battery supply will run the cameras for more than 24 hours.

The Receiver Package contains the video microwave receiver, monitor, recorder, antennas, and cables. The unit contains internal batteries which may be charged from 115Vac or through the 12Vdc auto cable. The recorder may record up to 2 hours on a single tape.

The Portable Transmitter may be one of your standard portables used in the department or one of ours that is equipped with a DTMF encoder pad. The multichannel radio may be used for other operations. The DTMF encoder sends signals to the control receiver which allows the operator to pan, tilt, zoom, and focus the camera. The video signal from the video transmitter is then sent to the receiver in the surveillance vehicle where the operation may be recorded.

If you have one of our older systems, the portable receiver may be up-graded for a minimal cost.

Receiver Package

Portable Receiver Kit KSR-3650 E1

Optional 14db gain antenna

Directional antenna increases range two to four times

KSE-202 (E2) Encoder/Controller

We have several Receiver kits available for this system. The above receiver is recommended because it reflects the latest receiver design using diversity receivers.

Antennas are the most important part of all microwave systems, we recommend a omni antenna for the transmitter and a directional antenna for the receiver.

The “cop proof” camera control system come in two models. First the Touch Tone Pad (E1) concept and the E2 model that has basically uses a joy stick approach. Both work great, but the E2 version is more “cop proof” than the E1 encoder. The E1 encoder is shown above.

Price List

Decoy (Remote unit)

Transmitter, 5 watt, KST-2/500	\$3800
Transmitter, 3 to 10 Watts, with audio	\$6500
Pan & Tilt, PTZ-357	\$1895
Control Receiver, R357	\$495
Antenna, KSA-6-2450	\$225
Camera, Color, KSC-231S	\$560
Camera, Low light, B/W, KSC-902H	\$495
Lens, 15 x 300mm	\$1695
Assembly, cables, cooling fan, wiring	\$475
Batteries, 2ea, Odyssey Drycell, Solid Oak Case	\$750
Charger	\$125
Installation (add to systems price)	\$750
Typical System Price plus installaton	\$8450

Portable Receiver & Control Unit

KSR-3650 E1 Receiver package w/control trnsmitter & encoder	\$7995
--	--------

Optional Equipment

Front Pivot Camera System	\$350
IR Glass - (used in windows for daylight surveillance)	\$25/sq. foot
Antenna, Receive/Transmit, High Gain KSA-14-2450	\$225
Add audio to microwave system	no charge
Installation	Call
Video Motion Detector KSMD-1001	\$595
Window Covering	Call
Camper Shell	Call
Optional Hi-res recorder (ADD)	\$250
